Company Background

Infinity Technology International Ltd is a leading IT/ITES Company in Bangladesh and abroad. In November 23rd, 1993, Infinity was founded by a group of graduates from U.S.A., Australia, Bangladesh and family members of renowned freedom fighters.

INFINITY is thriving in Research, System & Solution Design, Development, Cyber Security, Quality Assurance, Training, etc. Its major shareholders are from prominent business group like S. Alam Group. In addition, other shareholders are very familiar in this business domain. The organization has many alliances / partnerships with foreign renowned organizations like Winitech Co., S.T. Logic, KEPCO KDN, Trinion Inc., Oracle, Qualitype GmbH, Eagle Ridge, Ducsan, Kaspersky etc.

As a fast-moving dynamic company, Infinity's business focus is in Government Sector: Education, Defense, I.C.T., Financial, Infrastructure, Training is foremost but not limited. Subsequently, the organization has achieved numerous appreciations, certifications and cheers from other clients and stakeholders.

Infinity aims towards not only to meet the business requirements of clients but also can actually deliver beyond expectations as we have the capacity to invent and improvise to provide better solution. We are always ready for crafting new strategy to reach appropriate solutions to our clients' crucial requirements. Along the way, we integrate global best practices with customized and creative ways of doing things to reach our goals. Our possible strategies presented allows the client to assign weightage according to its needs and decide on a way forward to meet their business requirements and growth.

During its development path, it has also earned substantial quality certifications from world- renowned Credential Assessment Authority. Attainment of ISO 9001:2015 and CMMI Level 3 certifications are prime of them.

Sector wise Projects

Collaboration with

BANKING SECTOR

World Bank

INFINITY is the official Partner of for joint investment to pilot a project named "IOT-BASED SMART AQUACULTURE FOR SHRIMP (*Penaeus monodon*) CULTURE TECHNOLOGY INNOVATION, PILOTING AND COMMERCIALIZATION" which is in implementation stage at present in Shyamnagar, Satkhira, Bangladesh. Our collaboration will keep looking forward for further investment and implementation of various ideas focusing in 4IR and SDGs.

1. 'Infinity365'- Core Banking Solution

ITIL has developed its own designed Core Banking Solution (CBS) and already implemented successfully in 3 (three) well-known banks in Bangladesh. Based on the customer demand, the software is customized by the qualified engineers and continually provides better services with progressively new advanced technologies.

'Infinity365'-CBS is a banking application that enables a phased and strategic approach to improve operations, reduce costs, and prepare for growth. Implementing a modular, component-based enterprise solution ensures strong integration with your existing technologies. An overall service-oriented-architecture (SOA) helps banks reduce the risk that can result from multiple data entries and out-of-date information, increase management approval, and avoid the potential disruption to business caused by replacing entire systems. It should be mentioned that, we had started upgrading the software for CBS investing our 20 years of Banking and IT experience. It is highly Parameterized, Secured, Robust, Industry Standard, state-of-the-art Browser Based Real Time Online Core Banking Solution to serve not only all the present-day demand of your bank but also to guide the bank to extend its business and to enhance profitability.

2. 'Remit Infinity'- Remittance Software

Remit Infinity is a web-based remittance business management software developed by Infinity Technology International Ltd. back in 2004. It has been designed to automate the entire process of remittance business starting from fund transferring to fund distribution. Remit Infinity is superior to other vendor's solution because of the fact that it has the unique facility of maintaining entire back-office data like GL Transaction, GL Ledger, Cash Book, Trial Balance etc. and thus makes our customer more confident on our solution. Another Important aspect of 'REMIT INFINITY' is its flexibility in accommodating new compliance issue. So, when central banks of remitter's/ beneficiary's countries impose new compliance issues or make any changes/new requirements in remittance business, 'REMIT INFINITY' can very quickly and easily address those compliances issue/requirements. Thus, users of REMIT INFINITY are in a comfortable position to continue their business with new compliances/ requirements without any delay or hassle.

1 Digital Municipality Services System, under e-Government Master Plan, Ministry of ICT & Telecommunication

To make Digital Bangladesh, the Government has taken many steps to develop IT infrastructure

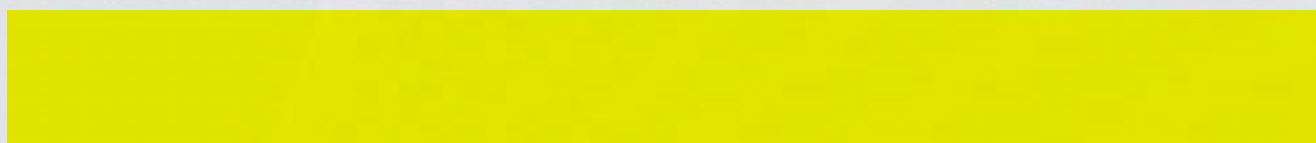

in every single wing of local government. As per this vision, e-Government Master Plan was published and under this master project, the first and most successful project of ICT Division is Digital Municipality Services System (DMSS). This service was inaugurated by the honorable ICT Advisor to the Prime Minister, Sajeeb Wazed.

We are the successful partner of this DMSS project who have implemented this system to nine municipalities and one City Corporation in this country and this system is running smoothly. We are the maintenance partner of this system from Bangladesh side.

2. The Operation and Maintenance of the Padma Bridge Project- Mawa & Jajira Plaza
Infinity Technology International Ltd. is the official Local Partner of SAMSUNG Traffic (STraffic), Korea who is the Development partner of Korean Expressway Corporation (KEC) for Toll Collection System of N8, Dhaka-Mawa-Bhanga Expressway.

We feel very accomplished for being a part of this project in the Operation and Maintenance sector.

1. Training Management System (TMS)

The Bangladesh Navy, established in 1971, stands as a cornerstone of the nation's defense and maritime security apparatus. With its primary mission to safeguard Bangladesh's maritime interests, protect its sovereignty, and ensure the safety and security of its maritime borders, the Bangladesh Navy plays a vital role in maintaining regional stability and fostering maritime cooperation.

We feel honoured to have the unique opportunity to contribute to our beloved country's navy by building a Training Management System (TMS).

2. Library Management System of Navy

Library management system is software that is designed to manage all the functions of a library. It helps a librarian to maintain the database of new books and the books that are borrowed by members along with their due dates. This system completely automates all the library's activities. The best way to maintain, organize, and handle countless books systematically is to implement a library management system software. This library management system is used to maintain library records. It tracks the records of the number of books in the library, how many books are issued, or how many books have been returned or renewed or late fine charges, etc.

3. Bangladesh Navy Officer's Information System (BNOIS)

BNOIS is a web-based system consisting of detailed information about each individual officer of Bangladesh Navy. The system consists of two parts. First part consists of the information database and second part consists of the web-based access system including user interactive platform. BNOIS was built because NS needs to deal with all the information of an officer including his personal info, course and career info, OPR info, transfer info, UN mission info and current appointment info,

Under the same account, a user can update or insert. This reduces separate file handling for an officer. The selection process for any course or mission has become easier by manipulating the available information. From the user end, all officers of Bangladesh Navy will get an access to their individual account and have the authority to view their basic information and update a few of their information. The user could apply for any types of leave in online and would get the permission or declination online.

1. Education Management Information System (EMIS)

EMIS can be defined as a system for the collection, integration, processing, maintenance and dissemination of data and information to support decision-making, policy-analysis and formulation, planning, monitoring and management at all levels of an education system. It is a system of people, technology, models, methods, processes, procedures, rules and regulations that function together to provide education leaders, decision-makers and managers at all levels with a comprehensive, integrated set of relevant, reliable, unambiguous and timely data and information to support them in completion of their responsibilities.

2. Learning Management System (LMS)

We are developing an educational software that serves as both a Learning Management System (LMS) and will be utilized by BANBEIS for teacher training purposes across 160 upazilas.

1. ICT Teachers Training for Secondary & Higher Secondary School Teachers of 160 Upazilas under Establishment of 160 Upazila ICT Training and Resource Centre for Education (UITRCE) phase II project

We are working on this project to provide ICT training to the teachers of secondary and higher secondary schools in 160 upazilas, which has engaged us as a local partner of a Korean company. There are two steps for the teachers training- first, TOT, which will be completed for 960 teachers from 160 upazilas and those teachers (after training) will provide training to 180,000 teachers as the second part of the Training under the project. ITIL is working for conducting the training including content management, trainee selection, training arrangement, supply of necessary equipment, venue management and other related tasks.

2. Learning & Earning Development Project (LEDP), Ministry of I.C.T. & Telecommunication

Infinity Technology International Ltd. as a partner of this project under Lot-6 has successfully ranked better position than others in training program through online for the COVID-19 pandemic with the instruction of the project office. We have successfully provided 200 hours of free training to at least 1,800 participants of four districts in this training program. Our Notable on:

- Professional grooming for freelancers.
- 600 unemployed youth received this training and earning globally.
- \$200,000 USD increased overall Bangladesh remittance while receiving training.

3. Establishment of Sheikh Kamal ICT Training & Incubation Center

One of the most successfully completed project of our company for skill development is with "Sheikh Kamal ICT Training & Incubation Center", which was awarded for Package: 02, Lot: 08. This is currently in progress in the areas of Barishal & Magura. We are providing the Web Designing training to 100 Trainees under this project in 4 different batches.

4. Enhancing Digital Government & Economy (EDGE)

One of the most successfully completed project of our company for skill development is with "Enhancing Digital Government & Economy (EDGE)", which was awarded for Package: 02, Lot: 08. This is currently in progress in the areas of Barishal & Magura. We are providing the Web Designing training to 100 Trainees under this project in 4 different batches.

5. Her Power Project (Empowerment of Women Through ICT Frontier Initiative)

Infinity Technology International Ltd. is a partner of this project under SP-14 .We provide training for women freelancers under 4 districts and 12 upazilas under Barishal Division. We provide training to 960 women, divided into 4 batches and 110 training days. We provide training for the following courses:

- Graphic Design.
- Digital Marketing.
- Web Development.

6. Freelancer Training to 400 Trainees of Global Recruitment & Travels Limited

Infinity Technology International Ltd. has successfully completed Freelancer Training to over 400 trainees of our organization on UX/UI Design (Web Design and Development), Software Training, Content Writing & Translation Training, Accounting BPO, Software Development (Front End & Back End) to enable capacity for overseas replacement.

7. Freelancer Training to 210 Trainees of Security 360

Infinity Technology International Ltd. has successfully completed Freelancer Training on "Security Personnel's Role in Handling Emergencies, Prevention of Theft from Commercial Premises, Security Roles in Communications, Online Customer Care Support".

8. Effective Schools Through Enhanced Education Management (ESTEEM), ESTEEM Project Office

Ministry of Primary and Mass Education

In 2000-2004 Infinity trained government officers from the Ministry of Primary and Mass Education in "Word Processing and Spreadsheet."

9. Enhance the Capacity of Department of Livestock Services

Infinity Technology International Ltd. has successfully completed Freelancer Training to over 400 trainees of our organization on UX/UI Design (Web Design and Development), Software Training, Content Writing & Translation Training, Accounting BPO, Software Development (Front End & Back End) to enable capacity for overseas replacement.

10. Family Planning Association of Bangladesh

Enhance capacity building of 40 trainees on basic office application and computer trouble shooting. This skill development improves FPAB office employees to do their daily work.

11. Care Bangladesh

ITIL provide skill development to 16 trainees about Fox-Pro and SPSS for windows in Care Bangladesh.

12. bridge Education Consultants

Cambridge
Education
Consultants

ITIL provide skill development to 10 trainees about "Uses of Computer for Office Management" in their daily work. Those trainees are under the auspices of ESTEEM Project.

1. Advanced Intelligent Solution

ITIL has advanced solutions for supplying and installation of IT – based Tolling System, which involves configuration of lane equipment, toll plaza equipment, vehicle detector & classifier. ITIL aims to provide advanced software for monitoring of system information and supervise the system usage condition.

We are providing services for making a natural language processor (NLP) of Bangla that will integrate machine learning and artificial intelligence (AI). This AI can help our country to increase domestic production, reduce costs and ensure security to a great extent. We assist in implementation of new technologies based on deep learning, IOT and sensors and many such latest technologies at the policy level.

2. Surveillance Systems & Data Centre

ITIL has greatly expanded the product line and began multi-faceted marketing to the rapidly growing security market – CCTV Security, Surveillance System and automation equipment. Moreover, ITIL provides Point of Interconnection (POI) and Data Centre facility in Bangladesh and also offers comprehensive support to design and manage data centers across heterogeneous platforms.

3. Document Management/Archive/Scanning Solutions

Infinity Technology International Limited (ITIL) is a 30-years-old IT firm. We have provided solutions to a lot of projects in the local and international markets. Among those projects, one of them is document management software. A major portion of our clients are banks. They require the conversion of a lot of manual data for digitalization in their day-to-day system. For that, we do all kinds of work for document archiving/management/scanning work like data entry in our software. We scanned their document and uploaded to our software for the future. We also do data entry for them in document management software.

1. Aspire to Innovate (a2i) Program

As the flagship program of the Digital Bangladesh agenda, a2i's goal is to inspire developing and developed nations on public service innovation and transformation by sharing the ground-breaking insights and we are one of the major companies who provide complete support for the maintenance of another project by a2i.

2.

Call Center

Infinity has established its Call Center support from the 2018 till today. It has created another effective wing for ITIL team to move forward with its excellency. We have deployed our Call Center for Northern Electricity Supply Company Ltd. (NESCO) and consistent support on 24/7 basis. Additionally, we had to trained the employees to maintain the support system.

1. Bangladesh Rural Electrification Board (BREB)

Construction of Energy Storage System (E.S.S.) and Geospatial Information System (G.I.S.) in Bangladesh. (Donation Fund USD 15 Million by KIAT (Korea Institute for Advancement of Technology) Govt. agency.)

- Project Implementing Partner: Woojin and St Logic (South Korea)

2. Northern Electricity Supply Company Limited (NESCO)

Establishing SCADA, D.A.S., Electric Big Data Analysis and Electric G.I.S. at NESCO

- Project Implementing Partner: KEPCO KDN (South Korea)

- Project will deliver power system services by applying advanced I.C.T. technology in the entire power sector. In addition, it focuses on to proceed A.I., IoT, Cloud, Big Data, Mobile, SCADA, D.A.S. and Electric G.I.S. in the time of the 4th industrial revolution.

3. Sustainable and Renewable Energy Development Authority (SREDA)

Pre-Feasibility Study for establishing Wind Power Plant 50MW in Bangladesh through Public Private Partnership project.

- Project Implementing Partner: Donghae Engineering and Consultants Co. Ltd. (South Korea)

1. Bangladesh Road Transport Authority (BRTA)

Modernization project of driver's license and qualification for commercial motors in order to facilitate an advanced traffic culture in Bangladesh {\$14,500,000.00 (KOICA Grant)}.

- Project Implementing Partner:

- i. KoROAD (Korea Road Transport Authority): Driving license management
- ii. KOTI (Korea Transport Institute): Law & policy consulting
- iii. KOTSA (Korea Transportation Safety Authority): Vehicle management

- Project Content:

We aim to deliver a master plan of driver license training and practical test / commercial vehicle license management. For the sake of knowledge transfer, we will conduct training course specifically fine-tuned for the trainees.

2. Roads & Highway Division (RHD)

To purpose of this project is to "Supply, customize, implement and maintain a proven off-the-shelf modern real time web based online centralized toll collection system with web-based monitories and related services Toll Collection of Dhaka-Mawa-Bhanga-Patharchar Expressway for 3(three) years".

- Project Implementing Partner: Hi-pluscard Corporation (S.M. Group)-Korea Expressway Corporation (K.E.C.)- Straffic.

Our goal is to establish a smart and modern driver license test center and commercial vehicle management center.
